Sample **Cheesecake 8**

Sample ID	SD230915-053 (84609)	Matrix	Flower (Inhalable Cannabis Good)
Sampled	-	Received	Sep 15, 2023
Analyses executed	CAN+, MWA	Reported	Sep 18, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.87%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-THC or d9-THC. At this time there are no reference standards available for (+)-THC. (+)-THC is a different compound from the main (-)-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-THC and d9-THC with the majority, if not all, of the concentration being (+)-THC. Total (+/-) D8 Concentration is estimated to be: 7.47%
